

## **Musculoskeletal**

Neck pain (with symptoms radiating not beyond the acromion)

Cervical radiculopathy (with symptoms radiating beyond the acromion)

Adhesive capsulitis

Rotator cuff tendinopathy/overuse

Conservative shoulder management – rotator cuff tear, dislocation with/without rotator cuff tear

Post-surgical shoulder management – rotator cuff tear, dislocation with/without rotator cuff tear, Hill-Sachs lesion, Bankart lesion

Elbow pain (medial or lateral elbow tendinopathy)

Wrist fracture

Carpal tunnel syndrome

Lower back pain – facet joint, work-related (acute, chronic/reoccurring, with symptoms radiating not beyond the gluteal fold)

Lower back pain – discogenic (with symptoms radiating beyond gluteal fold)

Laminectomy

Hip replacement

Hip fracture

Acute hamstring tear

Knee replacement

Knee pain (anterior, PFJS, OA)

Conservative knee management (meniscus/ACL tear)

Post-surgical knee management (meniscus/ACL reconstruction)

Achilles tear (conservative and post-surgical management)

Ankle sprain (acute, chronic/reoccurring)

Ankle/foot fracture

Shin pain

## **Neurological**

TBI

SCI (paraplegia)

MCA

Cerebellar, pontine, cerebellopontine stroke

Basal ganglia stroke

GBS

MS

PD

Laminectomy

## **Cardiorespiratory**

Pneumonia (community acquired or post-trauma)

Asthma (with or without viral infection)

COPD (chronic or acute)

Emphysema (with or without viral infection)

Myocardial infarction – NSTEMI (Percutaneous coronary intervention – PCI or angiography)

Coronary artery bypass graft – CABG

Congestive cardiac failure – CCF

Multiple fractures (Ribcage, upper limb, lower limb) and USCUD

Laparotomy

Thoracotomy

Ileostomy

Appendectomy
